

Toshiba Carrier to Release New Model of NEXT AIR Residential Ducted AC System in Japan

KAWASAKI CITY, Japan, Feb. 7, 2023 - [Toshiba Carrier Corporation](#) (TCC) announced that its Toshiba NEXT AIR V5 Series, new models of its residential ducted AC systems, will be released in April in Japan. TCC is a part of Carrier Global Corporation (NYSE: CARR), the leading global provider of healthy, safe, sustainable and intelligent building and cold chain solutions.

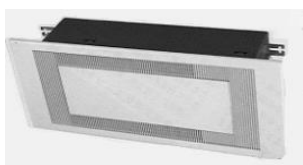

The new models fully comply with the amendments to Japan's Act on Rational Use and Appropriate Management of Fluorocarbons, the country's new environmental standards. They can be retrofitted to the systems of the V1 series launched in 1997, which would not require large-scale replacement work with the use of the existing pipes and ducts.

"Our intent in launching the new models of NEXT AIR is to capitalize the growing need we see for residential ducted AC systems in Japan," said Toru Kubo, President, Global Comfort Solutions (Japan), Carrier. "With these new models that allow retrofitting of older systems that are out of compliance, we can better serve customers and address their needs with more sustainable solutions."

Key features of new models, include:

- Common external dimension between conventional and existing models of indoor units for easy retrofitting.
- Connection port design and nominal diameter that allow to retrofit existing ducts and refrigerant pipes.
- No large-scale reform work necessary for update the air conditioning system to new generation; only the replacement of equipment is required.
- Replacement work takes about one day.
- New models adopt low-GWP refrigerant R32.

NEXT AIR New Models

Indoor Unit
NTS-NR502V5, NR632V5

Outdoor Unit
NTS-NAR502D5

Outdoor Unit
NTS-NAR632D5

Corresponding Models for Retrofit

New model (Indoor unit / outdoor unit)	Conventional models (Indoor unit / outdoor unit)
NTS-NR502V5 / NTS-NAR502D5	NTS-N502V1/NTS-NA502D1 NTS-N502V2/NTS-NA502D2 NTS-N502V3/NTS-NA502D3
NTS-NR632V5 / NTS-NAR632D5	NTS-N622V2/NTS-NA622D2 NTS-N622V3/NTS-NA622D3
